Shubhneet Goel

Shub Goel | Virtual Technology Consultant | Remote Chief Technology Officer | Virtual Software Automation Consultant (Software) | Remote Software Automation Engineer | Virtual Robotic Process Automation Consultant

Delhi

Summary

I am a Virtual Software Automation Consultant who has spent over a decade building and using Softwares for Automation for small startups to large enterprises.

As a Remote Software Automation Engineer, I deep dive into the business process and analyze various manual processes that are performed on day to day basis and I implement best practices of automation to perform them automatically and efficiently with the help of software.

As a Virtual Robotic Process Automation Consultant, I have automated over 100s of processes to date ranging from Data Entry to Decision Support systems.

Automation is no longer just a problem for those working in manufacturing. Physical labor was replaced by robots; mental labor is going to be replaced by AI and software.

For Projects, Please visit the projects section of my profile.
