

S2 [Security Services] Ltd
The Asset & Information Protection Specialists
Protecting Your Business Environment

INFORMATION THEFT A CASE OF GIVE AND TAKE?

Your office environment is never more **vulnerable** than during building works, refurbishments or the installation of new systems. And **with any luck**, rubble or building tools will be the only **unwanted items** left behind. Changes to your work space easily allows an adversary or **competitor** to leave an unwanted calling card. Even with the most rigorous security regime in place, **un-vetted** individuals will seize or exploit this **opportunity** to get into sensitive and difficult to access areas, with the aim of planting **unauthorised** eavesdropping **devices**, to gather sensitive commercial and business **data**.

But why make it easy and become a data target? An **effective** technical and physical electronic **counter-measures** programme can be easily built in to the works **schedule**, taking into account particularly vulnerable **project milestones**, such as: the final fix and handover, deep cleaning activities, the completion of **systems installation**, to name a few.

Contact **S2 [Security Services] Ltd** to discuss and identify how we can implement a viable and effective electronic and physical counter-measures routine to further protect your business premises from such unwanted attention. **After all what have you got to lose?**
