MUHAMMAD OUSAMA GHAZALI

Software & Web Consultant / Architect / Developer
+973.33.543789 | moghazali@gmail.com | ghazali.tel

Summary

Having over 18 years of software development and information management experience, is skilled in designing and developing solutions architecture according to industry best practices. Has worked extensively on developing security and business software solutions for government and consumer organizations using expertise on full stack programming and development based upon Microsoft .NET platform and related technologies/frameworks.

Software Experience

- Analyzes manual processes, designs solutions architecture, and develops programs & integrations to automate those processes.

- Lead teams and projects from development to delivery on advancement of various products for business requirements of internal and external stakeholders.

- Experienced in evaluating customer requirements and implementing beneficial solutions.

- Skilled in developing and maintaining websites, web portals, mobile apps, e-payment systems, workflows, document management systems as well as SMS systems.

- Develops database-driven web interfaces for rapid and real-time information sharing.

- Designs, codes, tests, documents, and writes SQL stored procedures.

- Developed modern, responsive user interface for various products of current and past employers with successful deployment of updated version for clients.

- Developed strategies for upgrading products' code and features, including implementation of short- and long-term goals which greatly improved useability for end-users.

- Designed and built Windows services and desktop applications utilizing multithreading, FTP & network programming in well-designed & custom-architected solutions optimized for specific team-organization and product requirements, such as to mitigate synchronization and integration challenges from various remote-sites-to-server-over-limited-bandwidth.

- Provided in-person and on-site technical support to customers including troubleshooting, software deployment, and training.

- Have experience with webmaster duties for domains, websites, and email services.

- Experienced in managing shared, semi-dedicated and virtual private hosting.
